DETAILED ACTION

1. Claims 1-5 and 7-29 are allowed. These claims have been renumbered as claims 1- 28. Claim 6 was cancelled in the amendment received on November 13, 2006.

Drawings

2. The drawings filed on August 14, 2006 are accepted by the Examiner.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kyle Turley on January 26, 2007.

4. Claims 1 and 17 have been amended as follows:
 1. (Currently amended) A computerized file management system for use with an existing file system, that includes a volume, and for managing electronic files on the volume, the file management system comprising:
a volume manager configured to manage the electronic files and to manage metadata relating to the electronic files, the volume manager being configured to

Art Unit: 2167

associate information related to changes made by a user to a selected file of the electronic files with the selected file; and

a user interface that enables [a]the user to view and manage, within the file management system, metadata associated with the electronic files, the user interface configured to:

- i) graphically display information about the electronic files and the metadata, the information being indicative of a transactional history of [a]the selected file; and
- ii) enable the user to manipulate the files and the metadata.

17. (Currently amended) The system of claim 1, wherein said user interface includes a make current feature that makes a previous version of a file a current version.

REASONS FOR ALLOWANCE

5. The following is a statement of reasons for the indication of allowable subject matter:

Applicants' response filed on November 13, 2006 overcomes the prior art rejection under 35 USC § 103 by Sitka and Brechner.

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including 'a volume manager configured to manage the electronic files and to manage metadata relating to the electronic files, the volume manager being configured to associate information related to changes made by a user to a selected file of the

Art Unit: 2167

electronic files with the selected file' and 'graphically display information about the electronic files and the metadata, the information being indicative of a transactional history of the selected file' as recited in independent claim 1.

The remaining claims, 2-5 and 7-29 are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

6. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

A. Kim et al. (Publication No. 2004/0107314 A1) discloses an apparatus and method for file-level striping; and

B. Delaire et al. (Publication No. 2003/0149695 A1) a storage area network methods and apparatus for automated file system extension.
